

# BECAUSE EVERY POUND COUNTS

## COUNT ON NORSEMAN STRUCTURES

### BEEF PRODUCTION FACILITIES

---

The more comfortable your herd is, the more weight they will gain, and the more profitable your beef operation will be.

Forces beyond your control can affect your operation, such as adverse market conditions or high feed prices. Fabric buildings by Norseman Structures are designed to minimize the impact of these factors by increasing your ability to control other elements that affect your operation.

You may not be able to control when it rains or snows, but you will feel secure knowing that your cattle are safe and dry under your Norseman Structures building.

Why Norseman Structures buildings for your beef facility?

- Natural light, open space and superior air quality combine to create a comfortable environment for your cattle, free of stress, that'll keep them coming to the feed bunks.
- Exclusive to Norseman Structures, our 5' integrated eave allows for faster installation reducing construction costs and setup time.
- Even on hot summer days your cattle will find shade in a Norseman Structures building, reducing their chances of developing heat stress.
- Ventilation is far superior to competitor buildings due to the open, rafter-free space and the high ceilings. Excellent conditions for herd and workers.

# Beef Production Facilities

Improve your feed efficiency and achieve better rates of gain by keeping your cattle comfortable and your feed dry in a dependable building solution by Norseman Structures.

## LOWER OPERATING COSTS

- Natural light inside a Norseman Structures building reduces the need for artificial lighting.
- Virtually maintenance free building reduces upkeep costs, saving time and money.
- Covering feedlot pens eliminates the need to plow out snow during the winter and reshape loafing mounds in the fall.

## VERSATILE

- Buildings can be used for multiple applications; from a barn for your feedlot operation to a cover for manure or additional storage for your feed or equipment.

## EFFICIENT

- Clear-span and high clearance interior allow for easy maneuverability of machinery.
- Relocate or extend the building as your operation grows.

## QUICK INSTALLATION

- Installed in a fraction of the time needed for traditional structures meaning less downtime and more time spent growing your operation.

## QUALITY SERVICE

- Our buildings are backed by the best installation and product support teams in the industry. You can rely on Norseman Structures for superior customer service before and after your building purchase.

Make your  
cattle comfortable,  
keep your feed dry &  
improve your gains.

**Norseman Structures has a full line of buildings** ranging in widths from 18' to 200', to any length. Our building consultants will work with you to determine the best building model and size for your operation.
